SiroCam UAF +	Must be used with Twain driver in Eaglesoft

Integrated via Video Capture Card (SVideo or Composite)

Cameras include but are not limited to:

- Air Techniques Acclaim SLC and VistaCam
- SciCan Ultimate, Classic III and Micro Vision
- Sopro 595, 617, 717, Care and Life Integrated via A-Dec
- Digital Doc Aurora and Evolution
- Progeny Cygnus Micro and Micro Plus

USB

Other cameras are integrated via S-Video or Composite connection. Patterson Companies currently supports the Startech S-Video/Composite to USB Video Capture Cable solution. It has been tested in Eaglesoft with composite and S-Video connections that allow video capture without the use of a video capture card.

- Previously DAZZLE DVD Recorder Plus and inDTube USB capture solutions were also supported.
- These models have been discontinued by the manufacturer.
- There is a DAZZLE DVD Recorder Plus HD model available, but it has not passed testing and is not supported by Patterson

Video Capture Card

"TV-Out" functionality present on some cards is supported solely by the card manufacturer or a local hardware provider. Video capture cards are only needed for SVideo and composite intraoral video cameras.
